Projects

- **Salesforce Project:**
Title: The Project Tracker
Client: Engineers Lab Pvt. Ltd., Nagpur, India
Duration: 5 months (July 2022 - November 2022)
 - Implemented a comprehensive Salesforce CRM solution for Engineers Lab Pvt. Ltd.
 - This project involves keeping track of Customer data/progress such as customer name, mobile numbers, email, project costs, deadlines, and project specifications. After the project is registered by the customer then an automated email is sent to customer with all the details. Additionally,

whenever the customer makes a payment, an invoice email is sent with the payment details to the customer. Finally, whenever project data/materials are uploaded to the customer's record by the client, then an automated email with google drive file link is automatically sent to the customer via email.

- Built custom objects, fields, relationships, validation rules, and page layouts to support the company's business processes.
- Automated workflows, approval processes, and flows to streamline operations and increase efficiency.
- Designed and developed dashboards and reports to provide real-time insights into business performance and customer behaviour.
- Migrated data from multiple sources into Salesforce, ensuring data integrity and consistency.
- Conducted training sessions and provided technical support to users, resulting in high user adoption and satisfaction.
- Achieved a 50% reduction in manual data entry time and a 40% increase in productivity.

- **Master's Individual Project:**

Title: "To develop a working model of 3D axis sun tracker for foldable PV panels."

Duration: 6 months (January 2019-September 2019)
